“ Using Tamlex and Proteus not only provided strong and durable products but maintained the overall steel appearance of the whole construction. ”

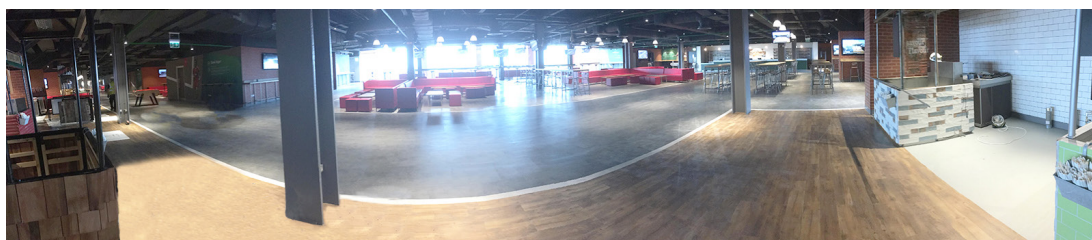

Tommy Poole

Proteus & Tamlex on the menu!

Award winning WhiteCrate specialise in the design and production of highly creative shipping container conversions, building semi-permanent and rapid deployment structures for UK & European clients worldwide.

A recent project has been the pop-up LFC Street Food in cooperation with Liverpool FC where the conversions have been ideal for fast food outlets adjacent to the football club. The electrical installation work was carried out by PS Electrical Services. For the cable containment Tommy Poole and Phil Stott chose Tamlex galvanized metal dado trunking connecting to a three phase Proteus ABX distribution board fully fitted with RCBO's.
