

“
 The equipment offered from Proteus has been first rate.
 Excellent value for money and being a local manufacturer the delivery time and back up beat any competitive offering I could find.”

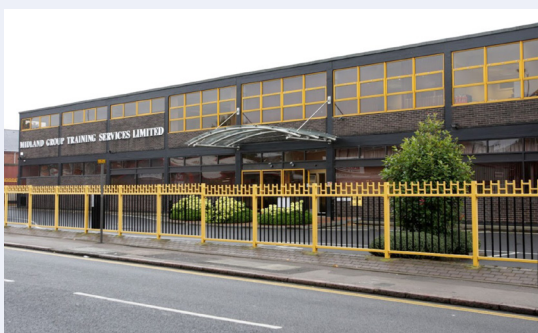

Simon Pritchard,
 ACS Electrical.

Powering up the Knowledge Midland Group Training Services

The expansion necessitated a review of the main electrical installation and to provide a new incoming supply, ACS Electrical Services chose an 18 way 4 pole MCCB 630 amp 4 pole MC panel board supplied by Proteus Industrial Switchgear of Telford. Supplied with digital multi-meters plus T12 surge / lightning protection the MC board in turn fed to other 3 phase distribution boards throughout the area.

Training provider for over forty years, MGTS (Midland Group Training Services) have seen such an increase in student numbers that it had become necessary to carry out a large extension of their premises in Redditch, Worcestershire. MGTS is employer-led and membership-based, supporting both young people and adults in the development of all the engineering competences associated with manufacturing production and maintenance.
